A.M. INGREDIENT

SPF with antioxidants

Just when you thought wearing SPF was enough, studies show that it's not. "SPF may block the sun's rays, but you need antioxidants to protect the skin from free radicals," explains Dr. Wexler.

ONE TO TRY Offering broad-spectrum UV protection with zinc oxide, **Innovative Skincare PerfectTint SPF 25 Treatment Sunscreen** contains vitamin E, centella asiatica, and olive leaf and aloe vera extracts to effectively protect the skin from UV-related free radicals and heal the skin during sun exposure. \$36, spafook.com
